## 1 Introduction

This is where your text goes. If you're new to  $\text{\LaTeX}$ , check out Overleaf<sup>1</sup>, an online  $\text{\LaTeX}$  environment where you can edit and render your documents. They also have a very useful [getting started guide](#).

Figure 1 is an example of how to include an image.

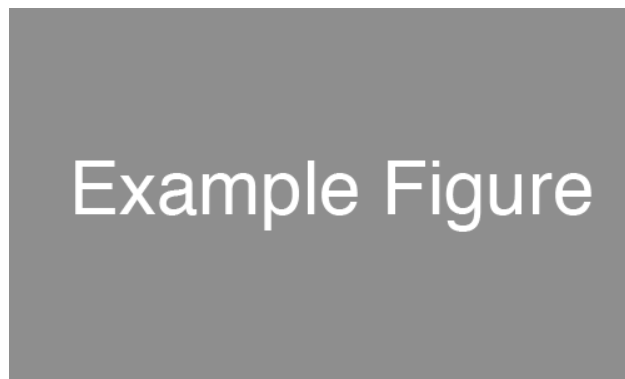

Figure 1: This is how to include a figure. As long as you use pdf $\text{\LaTeX}$  most file types (e.g., jpg, png, pdf) should work.

And here's some math:

$$\int_{-\infty}^{+\infty} e^{-x^2} dx = \sqrt{\pi} \quad (1)$$

You can also make numbered lists:

1. Thing 1
2. Thing 2
3. etc.

Or bulleted lists

- Thing 1
- Thing 2
- etc.

It shouldn't get much more complicated than that.
